## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 21 May 2007 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 18-28 and 73-81 are rejected under 35 U.S.C. 102(b) as being anticipated by Klein et al (US 5,279,565).

Klein teaches a catheter for delivery of fluid comprising an elongated support (generally 20), a porous membrane (51) wrapped around said support (Fig 3A and 3B), with at least one lumen (54,62) for fluid delivery. The support includes 4 ribs (52,29,54) which are fed from separate lumens (62), the lumens ending in dome shaped end portion (56). The device further includes a nonporous membrane (outer tube 20) proximal of the

porous membrane. The catheter includes guidewire lumen (30). The porous matrix has a pore size of 0.2 to 100 microns.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 18-28 and 73-81 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***
